EDUCATION

Purdue University, Mitch Daniels School of Business Expected May 2027
B.S. in Business Analytics and Information Management, Applications in Data Science Undergraduate Certificate West Lafayette, IN
Academic Achievement: Dean's List, Semester Honors
Certifications: Microsoft DP-600 Fabric Analytics Engineer, Google AI Professional, Google Data Analytics, McKinsey Forward Program

WORK EXPERIENCE

Business Analyst Intern – Transportation Strategy June 2026 – August 2026
Shopee (Shopee Express) | Digitalization and Project Management Team Ho Chi Minh City, Vietnam

- Launched a nationwide AI assistant with Product and Operations, combining 100+ SOPs, data on nearly **2,000** trucks, and on-duty contacts for all sorting centers, then introduced it to staff
- Presented leadership a new vehicle-accident penalty policy after modeling 501 cases, projecting cost recovery to rise from **11% to 58%**
- Built a route-consolidation model on 100K+ monthly records across 1,584 linehaul trips, finding combinations to cut trips by **22%**
- Prioritized trips and backup vehicles by analyzing **88K+** parcel records across 171 hubs, comparing parcel volumes with delivery deadlines to reduce the risk of parcels being left unshipped
- Mapped the end-to-end sorting center workflow from inbound truck arrival to outbound dispatch through hub visits and staff interviews, presenting the full process to the team as a baseline for improvement work

Business Analyst Intern May 2025 – August 2025
Renn Labs Boca Raton, FL (Remote)

- Streamlined a weekly SAP inventory report, reconciling stock levels with open customer orders to cut reporting time by **30%** (5 to 3.5 hours)
- Automated performance reporting with SQL-backed Looker Studio and Streamlit dashboards tracking trend, volume, and profitability, cutting manual tracking and giving end-users self-serve access
- Architected a multi-source data restructuring process for the "CQ" market intelligence platform, validating records against Crunchbase and PitchBook to remove duplicates, fill missing fields, and raise verified accuracy by **12%**

Business Analyst Intern May 2024 – August 2024
Tekup Consulting and Technology Da Nang, Vietnam

- Merged **150K+** CRM and advertising records via Python/R, increasing data match rates by **35%** and eliminating recurring manual data prep
- Benchmarked 6 competitor fleet-tracking platforms, flagging **4** feature gaps to recommend for the client's product roadmap
- Documented use cases, an ERD, a data dictionary, and flowcharts in draw.io and Figma for the client's product and engineering teams

PROJECTS

Workforce Capacity Planning Platform (Python, SQL, OR-Tools, Tableau)
Project Lead

- Saved **$41K** per 4 weeks by keeping temps on call instead of hiring 4 permanent workers, holding **99.7%** on-time delivery
- Developed a **32K+** order model across 3 warehouses linking demand forecasting, inventory planning, workforce optimization, and routing
- Tested 30 staffing plans against 36 demand and workforce stress scenarios, comparing overtime, temp staffing, hiring, and cross-training
- Found a perfect demand forecast would add only **$260** in savings, so operational flexibility matters more than forecast accuracy
- Traced **82%** of truck delays to one route with weather and road data, surfacing findings through an LLM assistant for plain-English queries

Stock Market Strategy Research Dashboard (Python, SQL, Scikit-learn, Streamlit)

- Compiled **6,600+** daily AAPL, MSFT, and SPY prices into a validated SQLite database, deriving RSI, MACD, and EMA features to train a Random Forest signal model on trends
- Lowered max drawdown by **4.8** points vs buy-and-hold (-19.1% vs -23.9%) in **6 of 6** walk-forward years (2024–2026)
- Engineered a Streamlit dashboard of signals, trades, cash exposure, and risk metrics, backed by **27** automated tests

Walmart Revenue Forecasting Dashboard (Python, SQL, Prophet, Power BI)

- Forecasted weekly revenue for 45 stores from 421K+ records, with Prophet beating ARIMA and XGBoost in 30 stores at **4.4%** MAPE vs 5.5% for a seasonal baseline forecast
- Caught data leakage that made XGBoost look best in 42 stores, then showed 30% markdown changes moved revenue under **1%**
- Deployed a Power BI dashboard of **52-week** store forecasts with 80% prediction ranges and markdown scenarios for planners

LEADERSHIP

Team Leader February 2025
Midwest Entrepreneurship Case Competition, sponsored by Sage Business

- Led a cross-functional team of 4 people to propose an AI-based healthcare solution, securing a **Top 10** finalist position
- Assessed ElliQ against 7 market alternatives and evaluated vendor performance to identify gaps
- Created a multi-scenario financial model in Excel to gauge business health and project revenue, supporting the team's stakeholder presentation

TECHNICAL SKILLS

Analytics & Programming: Python (Pandas, NumPy, Scikit-learn), SQL (PostgreSQL, MySQL, SQLite), Excel, R, DAX, PySpark
Data Visualization: Power BI, Tableau, Looker Studio, Streamlit, Matplotlib, Seaborn
AI & LLM Tools: LangChain, ChromaDB, Ollama, FastAPI, RAG, Prompt Engineering
Data Tools: Microsoft Fabric, SAP, Google BigQuery, Azure Data Factory, APIs, Web Scraping, Git/GitHub, Microsoft Copilot
